

ANTI-SKIMMING SOLUTIONS

INGENICO RX7000 & VERIFONE M425

ENHANCE PAYMENT SECURITY

Card skimming is a type of payment fraud that costs retailers, financial institutions, and customers more than 1 billion dollars each year. As a leading provider of robust technology mounting solutions, Havis offers a complete portfolio of payment security products to guard against skimming, tampering, and theft.

- **Protect revenue:** stop criminals capturing sensitive card data via skimming devices & other forms of device tampering.
- **Safeguard brand reputation:** reassure & protect customers with visible payment security measures.
- **Support compliance & reduce liability:** ensure your point of sale meets security requirements.
