

INSTALLATION INSTRUCTIONS:

- 1. Clamp the DBM-1150-CL series mount so that the balls are secured and will not rotate when fastening the bases to the mount.
- 2. Place your DBM-1000 series base onto the ball stem so that the teeth interlock as shown in IMAGE 3 Detail A.
- 3. Hold the DBM-1000 series base in position, and fasten securely in place using the hardware supplied with the DBM-1000 series base (6mm x 20mm long thread-forming screw, T30 Torx drive).
- 4. Ensure that base and mount are secured together tightly. Review that the teeth are interlocked as shown in DETAIL A. Continue to tighten the assembly as needed to ensure there are no gaps between the teeth.
- 5. Repeat the installation of your DBM-1000 series base on the opposite side of the DBM-1150-CL series mount.

VISIT WWW.HAVIS.COM TO BROWSE THE FULL CATALOG OF DBM-1000 SERIES BASES, DBM-1100 SERIES MOUNTS, AND DBM-1150 SERIES MOUNTS.
