- Weight capacity: 5 lbs
- Overall Length: 7"

## POWERING PRODUCTIVITY IN WAREHOUSES

Havis' rugged pole mounts, available in two configurations, deliver secure, flexible device mounting for demanding warehouse environments.

Both models feature TPU over-molded steel clamps that provide exceptional strength and vibration dampening, and are designed to mount to square, rectangular, or round poles ranging from 1.00" to 4.00" in diameter.

Offering full 360-degree movement, these mounts allow for maximum adjustability and are compatible with 4-hole AMPS patterns.
