Step By Step Installation

View of Interceptor Utility before installation.

1

Remove the Ford OEM tunnel plate. Using a 10mm head socket, remove (4) nuts. **Retain for later use.**

Step By Step Installation

2

On side of forward trim, remove (2) 7mm head fasteners.

3

Pull trim towards the rear of the vehicle. Unplug all connectors and remove from vehicle.

Step By Step Installation

4

Using a T-20 Torx head tool. Remove OEM Emergency brake switch, rear HVAC control or cover, and lighter plug.
Retain hardware for later use.

5

NOTE: The VSX console comes with clips pre-attached. If during the installation those clips are damaged, the OEM clips may be used.

Step By Step Installation

6

On the rear of the forward section of the Next Gen console, line up the previously removed parts to the mating openings.

7

Fasten the emergency brake switch along with the OEM rear HVAC controller or cover using the previously removed OEM hardware.

Torque to 12 in-lbs.

Step By Step Installation

8

Verify smooth operation of the emergency brake switch.

9

If using optional CM15600-08 fuse block, install on passenger side of console using supplied hardware. **Torque to 12-lbs.**

Step By Step Installation

10

If using the optional CG-X, attach to the rear, mounting bracket now.
Holes have been pre-drilled.

11

Place rear, mounting bracket in vehicle over rear mounting studs.

Step By Step Installation

12

Tighten down the rear bracket on the studs using previously removed OEM M6 nuts.

13

Place the forward mounting brackets under the rear ductwork. Line up the brackets to the OEM studs. Attach using OEM M6 nuts.

Step By Step Installation

14

Place cross brace between side brackets and attach using supplied hardware. **Torque to 24 in-lbs.**

15

For additional harness length, the OEM harness may be unclipped from the forward brace behind the radio.

Step By Step Installation

16

Lay OEM harnesses on top of cross brace.

17

The console has provisions for mounting a Motorola speaker on the rear wall. This must be installed prior to placing housing in vehicle.

Use supplied M4 x 12mm screws. Torque to 12 in-lbs.

Step By Step Installation

- 18** If not using the OEM Ford wiring conduit, install the wire conduit block off plate.

- 19** Install at rear of VSX console using supplied 1/4" x 3/4" Philips head bolts

Step By Step Installation

- 20** Place console in vehicle over previously installed floor mounting brackets.

- 21** Push console close to dash so that the mounting clips engage flush to the dash. Firm pressure will be required to engage (4) upper clips.

Step By Step Installation

22

Attach console to rear mounting brackets as shown using supplied hardware. **Torque to 24 in-lbs.**

23

Repeat for other side. **Do not fully tighten hardware!**

Step By Step Installation

24

Line up console to side floor mounting brackets and loosely install hardware. Do not install upper (2) fasteners. **Torque to 24 in-lbs.**

25

If using printer, run power cable and USB to opening in front, side of console. Attach Pocketjet7 to console using supplied screws as shown.

Step By Step Installation

26

If using the C-PMX-101, attach hinge to console using provided T-10 Torx head screws. **Torque to 8 in-lbs.**

27

Snap in latch assembly. Ensure the “U” part of the latch is facing the rear of the console. Press in latch until fully seated in console.

Step By Step Installation

28

Install paper roll in forward section of console. Feed paper to verify smooth operation. Printer installation is now complete.

29

Install mounting hood by lining up with slots in forward section of console.

Step By Step Installation

30

Line up with upper mounting holes and add hardware. Torque to 24 in-lbs. Repeat for other side.

31

Tighten all remaining hardware. Torque to 24 in-lbs.

Step By Step Installation

32

Snap side cover panels onto console.

33

Attach previously removed lighter plug to forward accessory panel.
Mount equipment to opening.

Step By Step Installation

34

Mount control head using supplied hardware and spacers.
Whelen control head shown. Assembly may differ depending on manufacturer.

35

Route wiring for accessories, plug in and mount panel in console forward opening.

Step By Step Installation

36

Press rear section of accessory panel until clips fully engage.

37

Add desired 1/4" nuts to extrusion for mic clip brackets.

Step By Step Installation

38

Line up trim strips to console and firmly press to engage clips.

39

If not using a lighting control head or printer option. The accessory pocket may be used in its place.

Step By Step Installation

40

Slide pocket into opening in forward section of console.
It should snap into position.

41

Installation is now complete.

Step By Step Installation
