Speaker grill

Main Console Housing

Note:
Newer style plastic speaker
grills snap into the large
holes in the side of console.
Grill mount hardware is only
required if attaching speaker
on the inside of grill.
Hardware not provided.
Recommended Hardware:
(4x) #8 Keps nuts, (4x) 8-32
x 3/4" screws

View of O.E.M. interior prior to installation of C-VS-1014-RAM-1 console.

Remove center seat and front and floor shift rod with knob. Leave OEM center seat brackets in vehicle.

Turn console on side to access shifter mount hardware. Place two (2) and 5/16" long spacers on forward studs

Place front shifter boot retaining / adaptor plate (27275) on spacers and attach with 1/4-20 serrated nuts.

Place OEM shifter with rubber boot into cutout and clip onto front retaining plate.

Attach rear shifter boot retaining / adaptor plate (27215) on rear studs with 1/4-20 serrated nuts. Clip on rubber boot onto plate.

Shifter assembly ready to go back into vehicle.

Attach cover plate on passenger side of console with supplied Torx screws. This can be done after console is installed, but passenger seat would need to be removed for access.

Carefully place console housing into vehicle on top of OEM center seat brackets.

****Be careful not to damage OEM plugs and harnesses****

Reattach shifter assembly back onto transfer case.
This can be accessed through passenger side speaker cutout.

Make sure shifter and boot are secure

Attach console floor brackets to OEM seat brackets with 5/16-18 X 3/4" Hex bolts, flat washers, lock washers and nuts.

Attach driver side forward trim panel with supplied Torx screws.

Console housing installed and ready to complete wiring, control head, and accessory installation.
Slide 1/4-20 hex nuts (provided) into side extrusions as needed for side mounted accessories
