C-VS-1508-INUT Assembly

View of Intercepter Utility before install

Remove OEM tunnel plate by removing rear nuts.
Front nuts only have to be loosened.
The OEM track is slotted at the front. (10mm socket)

Remove fasteners on sides of lower trim.
(7mm)

Remove lower dash trim by carefully pulling it
towards the rear of the vehicle.

Unplug and remove OEM 12 v socket and USB module.
Re-install lower trim and OEM fasteners into dash.

Install OEM 12 v socket and USB retaining bracket
into console top forward panel.

Loosen OEM nuts from front ductwork. (10mm socket)
Slide front mounting brackets under ductwork from the sides onto OEM studs. **Note:** Make sure brackets are below plastic vent and sitting on top of metal floor.

Attach front lower cross support to mount brackets with carriage bolts and serrated nuts.

Attach rear mounting bracket to floor studs using previously removed OEM nuts.

Slide console housing onto floor brackets and attach with carriage bolts and serrated nuts.
Tighten all hardware.

Plug wires back into 12 v socket and USB module.
Wire and install equipment as needed

Installation complete
