2021-2026 CHEVROLET TAHOE PPV & SSV

VSX CONSOLE

23% LIGHTER. 100% MISSION READY

The VSX Console is built for fleets that count on every vehicle, every shift. Engineered for the Tahoe PPV and SSV, it brings control heads, computers, and accessories into one organized platform that fits like factory equipment. Configure it once, then standardize across the fleet.

- **Lighter by design.** A steel and polycarbonate build cuts console weight to help protect range, without giving up strength.
- **Factory-look fit.** Precision-engineered to the Tahoe interior for a clean, OEM-style install.
- **Eyes on the road.** Ergonomic control placement keeps equipment within reach and reduces distraction.
- **One platform, every role.** Shared layout and accessories standardize upfits across the fleet.
- **Built for daily duty.** A heavy-duty steel chassis stands up to shift-after-shift use.
- **Configure to the mission.** 9" wide mounting section and additional 3.3" wide section. Mounting options and accessories adapt to each assignment.

ONE PLATFORM. EVERY CONFIGURATION.

Start with the console or choose a complete laptop or tablet package. Every VSX configuration shares the same rugged foundation, so you can match each role today and standardize across the fleet tomorrow.
