

Payment Skimmer Detection Tool

1. Insert the detection tool into the EMV slot in the payment device in the orientation as shown.
2. Push the detection tool fully into the payment device and observe that the tool slides fully over the pin pad buttons.
3. If the indicator window shows full green in color, the payment device is functioning correctly. If the indicator does not turn green or is partially red, remove the detection tool and inspect the payment device.

**** Note ****

The detection tool should slide into the payment device with minimal effort. If any binding or resistance is observed, remove the detection tool and inspect the payment device for any potential tampering.
