## C-VS-0618-INUT Assembly

View of Intercepter Utility before install

Remove OEM tunnel plate by removing rear nuts.

Front nuts only have to be loosened.

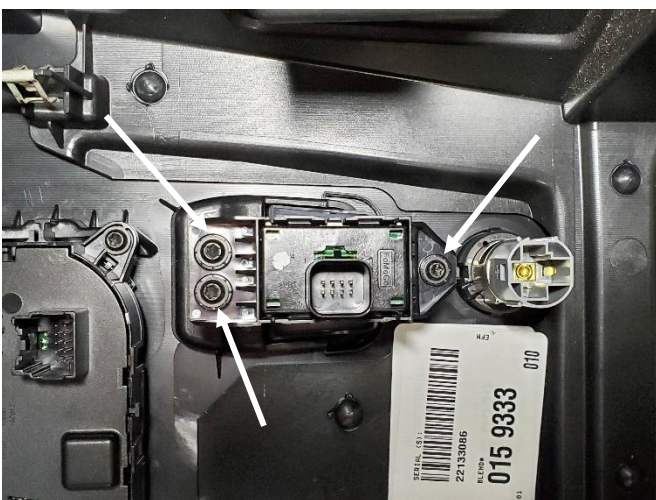

The OEM track is slotted at the front. (10mm socket)

Remove fasteners on sides of lower trim.  
(7mm)

Remove lower dash trim by carefully pulling it  
towards the rear of the vehicle.

Remove electronic parking brake, 12 v socket and USB  
retaining bracket. (T-20 fasteners) If vehicle is equipped  
with rear HVAC the controller will be removed at this time.

*Re-install trim and OEM fasteners into dash.*

Add #10 washer  
This location only

Install previously removed electronic emergency brake  
into side of console using supplied 10-32 x 3/8" machine  
screws. Add #10 flat washer for spacing between switch  
mount tab and threaded stud on console side panel.

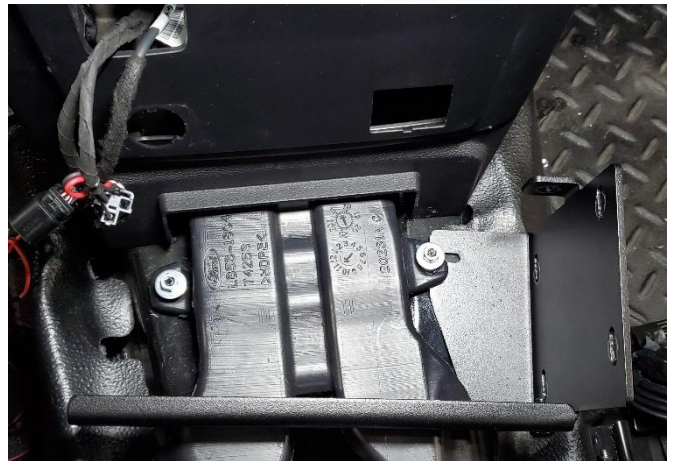

Washer not used on small bracket stud.

**NOTE: Do not overtighten mount screws.**

Confirm smooth functionality of the emergency brake.

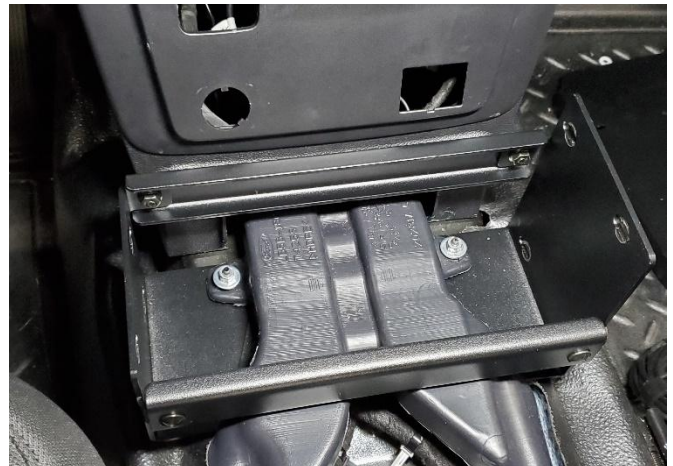

With cross supports detached, slide front mounting brackets under OEM studs from the sides.

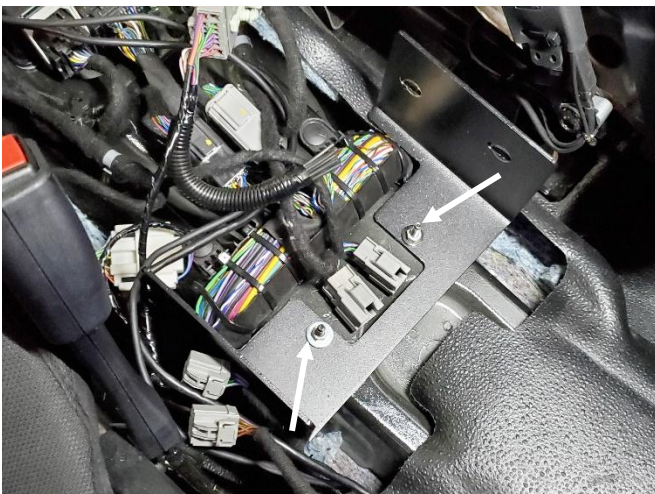

**Note: Make sure brackets are below plastic vent and sitting on top of metal floor.**

Attach front and rear forward cross supports using (4) 1/4" x 1/2" carriage bolts and nuts.

Tighten OEM nuts.  
(10 mm socket)

Attach rear mounting bracket to floor using previously removed OEM hardware. (10mm

Slide console housing over floor mounting brackets and push tight to dash.

Attach housing to **front** brackets with 1/4" x 3/4" carriage bolts and serrated nuts.

Repeat process for other side.

Attach housing to rear bracket with 1/4" x 3/4" carriage bolts and serrated nuts. Tighten all hardware.

Relocate OEM 12 volt socket and USB into console.  
Wire and install equipment as needed.  
Installation is now complete.
