Note:

Newer style plastic speaker grills snap into the large holes in the side of console. Grill mount hardware is only required if attaching speaker on the inside of grill.

Hardware not provided.

Recommended Hardware:
(4x) #8 Keps nuts, (4x) 8-32
x 3/4" screws

View of OEM interior prior to installation of C-VS-1014-RAM-2 console.

Remove center seat and front accessory pocket.

****Be careful not to damage OEM plugs and harnesses on transmission hump****

Carefully place console housing into vehicle on top of OEM center seat brackets.

Position console up against lower center dash

Attach console floor brackets to OEM seat mount points utilizing stock seat bolts

Optional C-HDM-214 pole can be installed at this time using the existing P/N 16223 (1/4" x 3/4" carriage bolts) in the side of console. Remove round knockout in pole face plate and attach plate to console around

Console housing installed and ready to complete wiring, control head, and accessory installation. Slide P/N 25520 (1/4-20 hex nuts) (provided) into side extrusions as needed for side mounted accessories

Attach trim panels front and rear on both sides of console with supplied P/N 16548 (10-16 X 3/8 screws). Adjust to cover edges of carpet. This should be done after console is installed
